I am a 6th-semester Informatics Engineering student specializing in Front-End and Full-Stack Web Development. With hands-on experience in React and the MERN Stack, I focus on building scalable, maintainable, and user-centered web applications. I am driven by problem-solving, clean architecture, and continuous technical growth.

Work Experiences

Self-Employed - Remote

Jul 2025 - Present

Freelance Web Developer

- Developed multiple custom web applications for academic and small business clients using React and the MERN Stack, delivering scalable and maintainable solutions based on client requirements.
- Designed and implemented RESTful APIs and authentication systems to handle dynamic data processing and secure user access.
- Built responsive and reusable UI components using React and Tailwind CSS to ensure optimal performance across devices.
- Deployed production-ready applications using Vercel and managed version control workflows with Git and GitHub.
- Collaborated directly with clients to gather requirements, provide technical solutions, and ensure timely project delivery.
- Optimized application performance and improved UI/UX structure to enhance overall user experience.

Education Level

Universitas Gunadarma - Bekasi, Indonesia

Sep 2023

Bachelor of Informatics, 3.74/4.00

- Relevant Coursework: Data Structures & Algorithms, Database Systems, Object-Oriented Programming, Web Programming,

Projects & Certifications

- Point of Sale (POS) System** (2025): Developed a web-based POS application to manage product inventory and transactions. Implemented CRUD operations, sales tracking features, and structured backend logic for efficient data management.
- Expense Tracker** (2025): Developed a full-stack financial tracking web application using MERN Stack (MongoDB, Express.js, React.js, Node.js). Implemented user authentication, CRUD functionality for income and expenses, and responsive UI design to ensure smooth user experience across devices.
- Task Management App** (2025): Built a task management web application using React.js with dynamic state management, enabling users to create, update, delete, and organize tasks efficiently with a clean and intuitive interface.
- HiveOffice Landing Page** (2025): Designed and developed a modern, responsive company landing page using React and Tailwind CSS, focusing on UI consistency, component reusability, and performance optimization.
- Achievements** (2024): Completed A bootcamp "Full-Stack Javascript Developer MERN", acquiring comprehensive skills in MongoDB, Express.js, React, and Node.js
